Transform Education with 3D Printing

www.touchapp.co.uk - Would 3D printing truly become a part of every school in the near future? Time shall tell as the clamor for the use of 3D printers in education is getting louder. The possibility of teachers and stud...

TECHNOLOGY

AUDIO in Google Slides - Tech Teacher

A new feature in Google Slides is the ability to add an audio file. No more hacking inserting YouTube videos to get an audio only recording on your Google Slides presentation. When teachers can talk less, students can do more. Creating interactive Google Slides presentations where students can click on an icon to listen to instructions or an oral prompt can enhance the activity...

Rubric Grading Criteria in Microsoft Teams Assignments

Microsoft Teams for education now includes rubric based grading. They can be created and reused across Teams making it a powerful time saving tool for teachers while at the same time helping students understand how to succeed in the assignment...
